Vintage Seiko Watch Shop Web Application

By Phil Gee

CS602 - 2022 - Spring 2

# What is the Vintko shop web application?

Vintko is an online watch shop that allows admin(s) to manage an inventory of watches while providing users the ability to browse and inquire about each watch.

# Technologies

- HTML/Bootstrap
- Node
- Express
- Express-session
- Express-handlebars w/partials
- MongoDB w/Mongoose
- Multer w/fs

# Functionality

- The app CRUDs 3 different tables with FK relationships.
- List view and individual view of objects
- There's a sign-in/sign-out feature to switch between users which presents a different experience, with middleware that prevents access depending on if admin.
- Errors are handled with a message system.
- Image upload and display with ability to remove or update, while uploading/deleting files from the local file system
- Two of the main routes can provide HTML or JSON.

Let's take a look!
